

David Altenhofen AIA

daltenhofen@facadegroup.com

David is a Building Enclosure Consultant and East Coast Director of The Facade Group. He is active in the architectural community at several levels, focusing primarily on reinforcing the architect's role in building science and tectonic integrated design. He is a past Chair of the national PIA Committee on Building Science and continues on the committee as an active emeritus member. While chair, David helped form the Building Enclosure Council initiative which is charged with starting local multi-disciplinary groups across the country to promote knowledge and discussion regarding the science and art of constructing building skins. Dave is an active Advisory Group member of the AIA Technical Design for Building Performance Knowledge Committee and is on the Board of Directors for the American Air Barrier Association and the Building Enclosure Commissioning Collaborative. At the Philadelphia AIA Chapter, he formed the local BEC and continues to be active in its programming.

David has extensive experience with masonry, windows, glazing, aluminum curtain walls, skylights, metal panel systems, precast concrete, roofing, waterproofing, building science, sustainability and forensics. Project types range from residential to high-tech in projects of all scales and complexities.

David was a member of the National AIA Advisory Board for the 11th Edition of Architectural Graphic Standards and was the Subject Editor for the chapter on superstructure and enclosure. He presents frequently at local, national and international events such as the AIA National Convention and Greenbuild. He has lectured and been guest critic at Drexel University and instructed a class on technology and systems integration in parallel with a 5th year design studio at Philadelphia University. Dave is well published and referenced in trade magazines.
