

John Suter, AIA, LEED® AP

jsuter@facadegroup.com

John has over thirty-eight years of corporate and institutional architectural practice. His experience includes organizing and directing large teams in the design, documentation, and construction of large or multiple building campuses. For the past thirteen years, John was a principal and Director of Quality for Kling and Jacobs with responsibility for company policy on Quality as well as technical review of all Architectural deliverables for multiple offices. Over the years John has provided literally tens of thousands of quality focused reviews of documents for all phases of delivery. During his tenure the Kling and Jacobs, projects under his review never resulted in a claim. John has been active in promoting sustainability within the Architectural practice by being active in the early years of Philadelphia AIA Committee on the Environment (COTE) as well as training Architects and Engineers in the various LEED systems. John was active in establishing the Philadelphia AIA BEC chapter.

John has extensive experience with masonry, windows, glazing, aluminum curtain walls, skylights, metal panel systems, precast concrete, roofing, waterproofing, and building science. Project types range from residential to high-tech at all scales and complexities.
