

Michael Falstad

mfalstad@facadegroup.com

Michael is a registered Architect and LEED accredited Professional with more than 20 years of experience in architecture, design, planning, and preservation. His work focuses on the assessment of building enclosures to identify sources of air and water infiltration and to determine appropriate solutions for repairs. His portfolio includes a diversity of projects varying in size and scope for buildings and sites throughout the greater mid-Atlantic Region. His approach to identifying appropriate solutions encompasses both historically-sympathetic and sustainable design philosophies.

Michael has degrees in Architectural History and Architecture. Prior to his education in architecture, Michael worked as a restoration carpenter where he developed skills in detailing and design that provide him with a solid foundation for his current work. While studying for his degree in Architecture, he worked full time for a planning firm specializing in community revitalization which reinforced his interest in maintaining existing buildings and improving their performance.

Michael is experienced in all phases of project implementation from conceptual design through construction documents, and construction administration.
