

## THE FACADE GROUP

### **Mike Williams**

mwilliams@facadegroup.com

With over 35 years in the construction industry, Mike has spent the past 22 years devoting his career to safely accessing, investigating and maintaining building enclosure systems. His experience ranges from extreme on-site building access and providing onsite fall protection and rescue services, to locating and evaluating water and air infiltration concerns in building enclosures. Because of Mike's specialized focus, experience, and training in forensic evaluations, he stands out as a top expert in the country. Combining a thorough understanding of building science with an advanced toolbox allows him to technically evaluate any complex building condition.

Mike has completed hundreds of building investigations ranging from single-story office buildings, to high-rise condos, and methodically and thoroughly examines each issue that confronts him to provide an accurate diagnosis and recommend procedures to correct the issue.
