

Hyperbolic Parabola

*Instructions and Inspiration by:
Phoebe Altenhofen*

- ▶ Fold your paper along the lines. The dotted lines represent a valley fold and the solid lines represent a mountain fold.
- ▶ Exaggerate the folds starting from each corner pinching.
- ▶ It should look like an accordion fold starting from the outside to the inside. As you fold, the paper will begin to collapse into itself.
- ▶ Slowly and carefully pull out the edges.
- ▶ You now have a hyperbolic parabola!
